- High network reliability by interconnecting to CHT Global MPLS-VPN backbone
- Enriched private network with any-to-any routing capability
- Cost-effective solution with integrated VPN services
- Easy installation and upgrades with existing Internet access and network infrastructure
- Quality network management and monitoring with 24x7 customer services
- Back up MPLS-VPN for corporate VPN total solutions

An Essential Tool to Grow Your Global Business

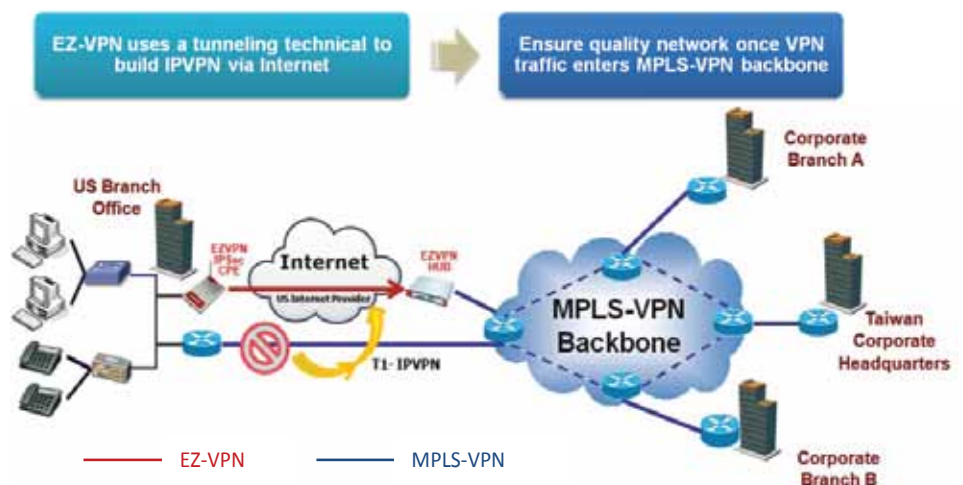

In today's economy, enterprises in all types of businesses are facing the challenge of increasingly complex network structure when expanding business globally. Your corporate and partner sites have to connect business across multiple locations and further integrate data and voice traffic over a scalable, economical, and dependable network while constrained by limited resources and budgets. Businesses are looking for viable value-added, cost-effective VPN solutions for meeting these needs.

CHTG EZ-VPN provides your business with a low-cost solution with flexible connectivity and better performing quality for your unique network requirement. The CHTG EZ-VPN offering is an enhanced VPN service which is based on the CHTG's MPLS-VPN solution. You don't need additional configuration on your site. CHTG EZ-VPN allows you to easily connect through Internet without any changes so as to benefit from a price premium while also enjoy quality any-to-any connectivity. CHT Global has its specialization in worldwide network coverage, particularly in Asia. Utilizing CHTG's reliable core network and MPLS technology, EZ-VPN offers you an easy step to connect global.

Overview

- An integration of IPsec VPN and MPLS-VPN with a cost-effective solution
- Use customer existing Internet for local loop; no extra circuit or IT change route needed
- Install an EZ-VPN Customer Premises Equipment at customer site using secure IPsec encryption
- Ensure reliable traffic quality once VPN traffic goes into CHT Global MPLS-VPN backbone
- Provide a backup option for customer's existing MPLS-VPN route

CHTG Global EZ-VPN Solution

- Accompany MPLS-VPN to build a comprehensive IPVPN network
- Use EZ-VPN as MPLS-IPVPN's Backup Route when T1-IPVPN is interrupted

KEY BENEFITS

- **Security:** Enhanced security within CHT Global MPLS-VPN core network architecture
- **Reliability:** Quality network with reliability, any-to-any connection for all sites
- **Cost-Effectiveness:** Cost savings by deploying technology resources efficiently
- **Simplification:** Simplified, fast installation without additional configuration changes
- **Satisfaction:** Powered by world-class CHT Global management; 24x7 English and Mandarin customer support from CHTG NOC
- **Total Solutions:** Global VPN total solutions, specially in Asia infrastructure. Build comprehensive VPN solutions by leveraging EZ-VPN as a backup mechanism for MPLS-VPN service management

Enhanced VPN Solution Based On MPLS-VPN Backbone

CHTG EZ-VPN is the expansion of the CHTG's existent MPLS-VPN architecture. MPLS-VPN utilizes MPLS technology to provide a private network where the scalability, security, and service capabilities are successfully improved. EZ-VPN solution allows you to use your own Internet access to interconnect to CHTG's MPLS-VPN backbone. In this way, you build an enhanced network by leveraging CHTG's reliable worldwide MPLS-VPN infrastructure.

Cost Efficiency Without Additional Configuration Effort

EZ-VPN is ideal for small/midsize businesses or remote offices with minimum IT requirement. EZ-VPN solution is designed to build on your existent Internet infrastructure without configuring multiple devices on your site. CHT Global implements one-time installation of a Customer Premises Equipment utilizing IPsec data encryption for your optimal security. You optimize your VPN operation costs and benefit from the stability in international transmission.

Enabling Multi-point Connectivity on VPN Solution

The traditional IPsec VPN limits the end-to-end connection over Internet. A problem that occurs at one part of the network could lead to loss in overall connection. To solve the problem, EZ-VPN allows you to connect to the CHTG's MPLS-VPN backbone so that multi-point connectivity is guaranteed, thereby enhancing your network connection.

Customer Satisfaction with world-class IT Management Services

EZ-VPN features CHT Global's 24x7 Network Operations Center (NOC) support. You do not need to worry about maintaining IT system on your own any more. Our professionals of NOC around the world handles network management that supports you 24 hours a day, 7 days a week.

Offering A Backup Route for Existing MPLS-VPN Solution

If you are already using CHTG's MPLS-VPN solution, EZ-VPN can further provide you with a backup mechanism for your existing MPLS-VPN service. When the primary local loop of your MPLS-VPN service is down, the VPN traffic will be automatically directed to EZ-VPN route. In this way, CHT Global guarantees you the most reliable traffic quality without service interruption anytime, anywhere.

Choose Right from CHT Global's Comprehensive VPN Solutions

CHTG Global offers cutting-edge solutions with over 15 years of experience, assisting our customers to succeed in their network environment across the world. Moreover, CHT Global partnerships with top ISPs in USA to offer over 150Gbps total bandwidth for IP transit. Let us help customize your most compelling individual VPN services.

CHT Global is the wholly-owned US subsidiary of Chungwa Telecom, the largest telecommunication company in Taiwan. Since 2002, CHT Global has helped numerous enterprises achieve their targeted goals while reducing customer side complexity by providing industry leading multi-site network solutions through its global backbone infrastructure and world-class service.
