

Internet Data Center - IDC Hosting Solution

Secure Your Data in a World Class Managed, Safe & Controlled Environment

KEY BENEFITS

- **Worry Free & Disaster Free** : Disaster preventions established through redundant power supply, controlled cooling, as well as fire detection/suppression, and closed circuit security monitoring
- **Business Continuity**: Have your enterprise consistently running at the highest level and reduce risk by outsourcing to our data centers
- **Room to Grow**: Flexible scalability with both the abundance of space and resource expansion available to grow as you grow
- **Consolidated Resources**: Store all your data and applications in the same location with dedicated environment maintenance. Reduce the need for multiple storage sites and reduce expense needed to build/maintain your own information system.
- **Unparalleled Customer Support**: 24/7 and 365 days of customer focused support, dedicated to solving your problems first

CHT Global's IDC (Internet Data Center) service is ideal for enterprises and service providers who intend to consolidate their data storage and applications in a secured and managed facility. In other words, enterprises will be able to outsource the physical storage, bandwidth provision, and facilities management to CHT Global. CHT Global's IDCs are stable controlled environments with uninterruptible power, high speed bandwidth, and enterprise-grade high level security.

Controlled Environments

As dedicated data storage facilities, the IDCs are designed to use consolidated resources to maintain environment levels, thus allowing enterprise equipment to constantly run at peak performance levels. Controls include state of the art HVAC (Heating/Ventilation/Air Conditioning) coupled with raised floors and ground up cooling systems to prevent machine overheating or dew collection from humidity. Redundant power supply backed up by diesel power generators is also a key feature, which adds to the controlled and consistent environment.

Dedicated Connection

The facilities also provide carrier neutral connection for Tier 1 internet access, and also provides high speed bandwidth to Taiwan and the Asia Pacific through CHT Global's IP network that includes direct TransPacific submarine cables. As high bandwidth and clear connectivity is a necessity for multinational enterprises, CHT Global makes sure that quality communication is guaranteed. Communication can also be enhanced through the CHT Global MPLS-VPN, ensuring secure and dedicated transmission of critical operations.

Physical Guarantees

The IDC facilities offer plenty of physical room to grow, ensuring enterprises the availability to scale up if needed. In terms of the physical premises, the buildings are fitted with seismic engineering as well as fire detection and fire suppression, thus implementing safety precautions and preventive measures to protect all your data and equipment. In addition, these facilities provide the utmost protection and safety of your data and equipment from tampering and unwanted access. CHT Global provides cages, racks, and cabinets with lock access to keep out unwanted intrusions. The buildings themselves are under 24/7 surveillance with CCTV (closed circuit television) and protected card key entry requirements. Security monitors are also stationed at the gated entry point to keep watch over all personnel who enter and exit the premises, thus offering that extra human variable into added security. Enterprises moving into CHT Global's IDCs will have the confidence that their data and equipment is and will continue to be in good hands.

KEY FEATURES

- **Global Coverage:** CHT Global's IDC network of 24 data site locations span 12 countries worldwide connected by our MPLS Network
- **Controlled Environments:** constant cooling through HVAC systems, fire detection and suppression
- **Uninterrupted Power:** Redundant power supply with diesel generator backup
- **Enhanced Security:** Card Reader Access, CCTV closed circuit camera, private caged rack areas,
- **High Speed Connection:** Access to CHT Global Network with direct connection to Asia, as well as multiple carrier neutral options
- **SAS 70 Type II** audited data centers in the US, and **ISO 27001** complying for international data centers
- **Suite of Managed and Value Added Services**
- **24/7/365 Hands-On Support**

CHT Global is the wholly-owned US subsidiary of Chunghwa Telecom, the largest telecommunication company in Taiwan. Since 2002, CHT Global has helped numerous enterprises achieve their targeted goals while reducing customer side complexity by providing industry leading multi-site network solutions through its global backbone infrastructure and world-class service.

For additional products and services information, please contact CHT Global at 1-877-998-1898, or visit www.chtglobal.com.

Expanding our Global Footprint

CHT Global creates the best environments and opportunities for enterprises to succeed on the global arena. Achieving greater scalability globally also means having a global presence, and being able to retrieve your data and run applications in relatively close distances. Today, CHT Global hosts over 18 data centers all over the world, and are still adding more each year. Current locations include: North America (USA), Asia (Taiwan, Japan, Hong Kong, Vietnam, and Singapore), Australia, and Europe (Netherlands, and the UK).

Why Change to Now?

Transferring your information system to CHT Global's IDC Hosting Solution can actually become an easy decision when weighing the pros and cons involved. By switching over to a hosted solution, you will be outsourcing not only the physical facilities and storage location of your data, but also all the bandwidth resources, environment control maintenance, facility security, and disaster prevention. In addition cost savings gained from consolidated facilities, shared resources, and having a dedicated host provider is an added bonus on top of an enhanced performance environment.

Outsource your equipment and data to CHT Global today and experience the instant benefits of reduced operational management, capital expenditure, as well as worry. Let CHT Global focus on managing the environment and maintaining top service levels, so that you can focus on making your business successful and the best that it can be.
